

New Product: PowerUltra 205. Completely redesigned for greater portability and convenience, the power ultra is ideal for using in the field for on the spot repairs and quick fab jobs requiring basic tig, stick and/ or plasma processes.

New Product: PowerMaster 256. This unit excels at doing about everything, which makes it ideal for use in factories where spot repair and portability are required. It also is perfect for motorsports enthusiasts, getting broken parts back in service to cross the finish line.
